

STARVIEW™

Medical Sealer Series MS/PH & ERB/PH Models

Starview's *MS/PH Series* Shuttle type Heat Sealers and *ERB/PH Series* Rotary Heat Sealers are specifically designed for the medical and pharmaceutical industries.

Standard features include high pressure sealing cylinders and stainless steel table and guards. Steel structure painted with white Epoxy paint. **Full touch screen operator interface panels include features to insure compliance with validation** including password protected timer and temperature values, on-screen timer and temperature settings, PLC functions and temperature & pressure log of the previous 99 sealing cycles. Low or high temperature alarms or low pressure alarms stop the machine operation until the difficulty is corrected.

The *ERB/PH Series* Rotary Heat Sealers are available in four, six and eight station designs. Available options include self-standing auxiliary feeders as well as finished package unloaders.

The *MS/PH Series* shuttles have a multi-zone hot plate and high pressure sealing cylinder. The sealing tray glides on linear bearings for ease of operation. Single and two sided shuttles are available.
